ANALYSIS

(*Collection*)

A. Grothendieck

This edition is a collection of A. Grothendieck's works on analysis reunited by Mateo Carmona. Remarks, comments, and corrections are welcome.

Typeset with LaTeX and the fabulous *memoir* class. Composed with Bitstream Charter for the text type and Paul Pichaureau's `mathdesign` package for the math type. All diagrams and illustrations were made with Till Tantau's Ti*k*Z (Ti*k*Z ist *kein* Zeichenprogramm) and the `tikz-cd` package.
